## FOR IMMEDIATE RELEASE

### Syneo Partners With New International Sales Representative

West Palm Beach, FL- April 11, 2013 - As one of the leading manufacturers in the medical device industry for automation and process controls, Syneo is pleased to announce its latest partnership with the Yamaguchi Sangyo Company. This addition of Yamaguchi to its team of international sales representatives will afford Syneo the opportunity to further its reach in Japan and increase customer relations throughout the region.

"Yamaguchi's reputation for quality service and technical expertise will be a great asset to our customers and we look forward to establishing a long-lasting relationship," said Kate Morrison, Marketing and International Business Development Manager at Syneo.

Yamaguchi has over 30 years of experience representing companies in the technology industry and will accompany Daiichi Jitsugyo Co., another Syneo International Sales Representative, in being the point of contact for manufacturers looking to purchase Syneo machines.

"We welcome the opportunity to represent Syneo in Japan. Our reputation for delivering leading edge technology in the marketplace, coupled with the advanced automated machinery of Syneo, will prove to be a very successful collaboration," said Fumiya Nadai, Sales Representative at Yamaguchi.

Syneo will be represented in the Yamaguchi booth at the MEDTEC Japan tradeshow in Yokohama, Japan on April 24-25. Machines that will be in the booth include: the Accu-Drill SD300C Automated Medical Tubing Hole Driller, the Accu-Cut 700L Automated Braided Catheter Tubing Cutter, and the Accu-Cut Micro II Automated Point-of-Use Medical Tubing Cutter for low volume production areas. Be sure to stop by booth 1104 and welcome Yamaguchi to the Syneo team.
